

About the company:

TECHEM - European leader in energy management

Techem, founded in 1962, is a German group that is known worldwide among co-owners and social lessors in the field of energy management. We contribute to the rational use of water and energy in over 20 countries. Techem employs more than 3,500 people in Germany and its international subsidiaries.

Techem Caloribel Belgium, your energy service provider

In its capacity as a leading energy service provider with an international reputation, Techem Caloribel Belgium faces a considerable challenge: a rational, and therefore economical, use of energy and water. Our mission is to reduce heating and water costs significantly for property owners, building managers and residents. Saving energy and raw materials simultaneously not only benefits all concerned, it is also good for the environment.

To strengthen our IT team, we are currently looking for an M/F:

Functional Analyst FR/NL

You will support our IT department technically in the development of our platforms.

Missions:

- Translate the needs of the business and of clients into a functional analysis applicable to generate the necessary solutions;
- Study and discuss the functional analysis with the N + 1 and report on the progress respectively;
- Test the solution in the integrated environment and/or assist the user in doing so;
- Assist/support the process of release management;
- Coordinate and implement the software solution;
- Draw up the necessary documentation and reporting;
- Write and update the end user guides;
- Participate in the mapping and modelling of internal business processes.

Required profile:

- Holder of a Bachelor or Master degree in IT orientation, or equivalent through experience;
- Comfortable with IT concepts and tools;
- Team spirit and autonomy;
- Ease of communication with IT and operational departments;
- Rigor and capacity for analysis and structuring;
- Fluency in French and Dutch.

Application open both to freelancers and to employees.
